The diagram shows a central cloud icon with three server racks below it, representing a cloud-based data storage and processing system. Five large black arrows point towards this central hub from different directions. The sources of the data are represented by icons: a person walking with a pulse icon, a person running with a pulse icon, a person sleeping in a bed with 'Z' symbols, a police officer and a person with a pulse icon, and a person holding a smartphone. To the right of the central hub, an arrow points away from the cloud towards a hospital building icon, indicating the application of the data in a clinical setting.
